

VALVOLE DI SICUREZZA GAS E TERMOCOPIE DI RILEVAMENTO FIAMMA

VALVES SAFETY GAS AND THERMOCOUPLES OF SURVEY FLAME

SOUPAPES DE SURETE GAZ ET THERMOCOUPLES DE RELEVEMENT FLAMME

Ricambio per i nostri bruciatori serie 85.

E' indispensabile per il controllo della combustione previsto dalle norme di sicurezza.

Viene controllata da termocoppia posizionata direttamente nel cono della fiamma.

Lo spegnimento della fiamma, per qualsiasi ragione, provoca la chiusura della valvola interrompendo l'erogazione del gas.

Exchange for our burners series 85.

And' essential for the control of the combustion foreseen by the safety norms.

It is checked by thermo junction directly positioned in the cone of the flame.

The turning off of the flame, for any reason, provokes the closing of the valve interrupting the disbursement of the gas.

Rechange pour nos brûleurs série 85.

Et' indispensable pour le contrôle de la combustion prévu par les règles de sûreté.

Elle est contrôlée directement positionné par thermocouple dans le cône de la flamme.

L'extinction de la flamme, pour n'importe quel raison, il provoque la fermeture de la soupape en interrompant la distribution du gaz.
